The Crawford Arcade, Stirling.

The Crawford Arcade, located in the heart of Stirling, has since Victorian times been the original shopping mall experience. Our client purchased the Arcade in 2005 with the vision of recreating the Mall's great days.

Our work remit was to totally renew all the shop fronts and upgrade the decoration of the facades and structures to create a more uniform look to the Mall. A new tiled floor however, gives a hint of a more modern look, but new and refurbished lighting helps to retain the feel and look of the original Arcade design. This is achieved using the mixture of old and new.

The finished look of the Arcade is very much in keeping with the original Victorian detailing but using more modern design and materials. The construction value of the works was £384K over a 20 week programme.

Each section of the Mall had scaffolding erected, for electrical lighting installation and decoration works, in phases, to minimise disruption to the shopkeepers.
